

Statistical Bulletin

December 2022

The report on taxable removals of tobacco products for the month of December 2022 has been compiled from information released by the Alcohol & Tobacco Tax & Trade Bureau.

LARGE CIGARS

In December 2022, large cigar taxable removals (from domestic factories and imports) amounted to 930 million cigars which was a decrease of 178 million cigars (down 16%) as compared to December 2021. For CY 2022, there were 13.10 billion large cigar taxable removals as compared to 14.77 billion large cigar taxable removals in CY 2021. This is a YOY decrease of 1.67 billion cigars (down 11%).

LITTLE CIGARS

In December 2022, little cigar taxable removals (domestic factories and imports) were 14.9 million cigars which was an increase of 5.7 million cigars (up 62%) as compared to December 2021. For CY 2022, there were 150 million little cigar taxable removals as compared to 338 million little cigar taxable removals in CY 2021. This is a YOY decrease of 182 million little cigars (down 54%).

A GLANCE AT THE LAST 10 YEARS

For a comparison of total taxable removals, cigars manufactured domestically (which includes Puerto Rico), see the three 10-year graphs for an overview of trends with taxable removals on pages 3-5.

LARGE CIGAR TAX CAP

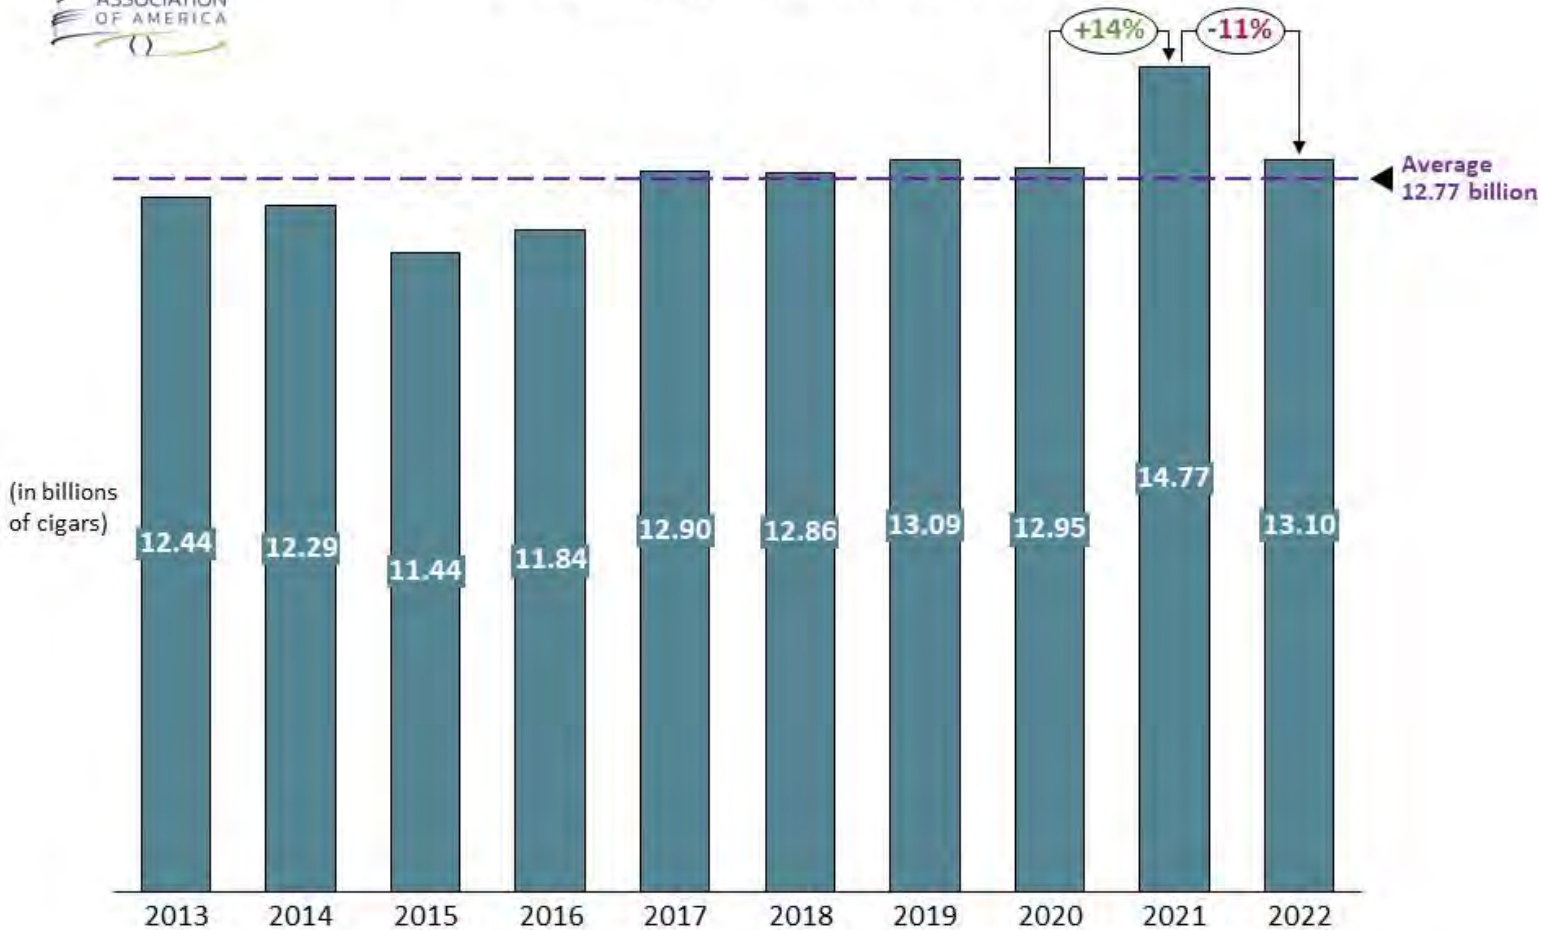

The federal excise tax on large cigars is 52.75% with a cap of \$402.60 per thousand – or 40.26 cents per cigar. The cap is reached with a manufacturer's sale price (prior to adding the excise tax) of \$763.222 per 1,000 (i.e., $\$763.222 \times 52.75\% = \402.60). The number of large cigar removals below and above the \$763.222 tax cap is reported only by domestic manufacturers.

Imports: *The TTB's monthly reports include data on cigar imports. But, that data comes from the Foreign Trade Division of the Census Bureau and does not show "taxable removals." Instead, imports are reported by tariff schedule classification reflecting the value at the time of importation. However, the excise tax on imported large cigars is applied not on the value of the import, but on the first sale in the U.S. Although there is no government data available on how many imported cigars are sold at or over the tax cap, the Foreign Trade Division does report on the number of imported large cigars entering the U.S. with a value of more than \$0.76 each.*

Please contact Dan Cotter at dcotter@cigarassociation.org with any questions or comments.

Large Cigar Taxable Removals

Source: Tobacco Tax and Trade Bureau Statistical Release - Tobacco Products.

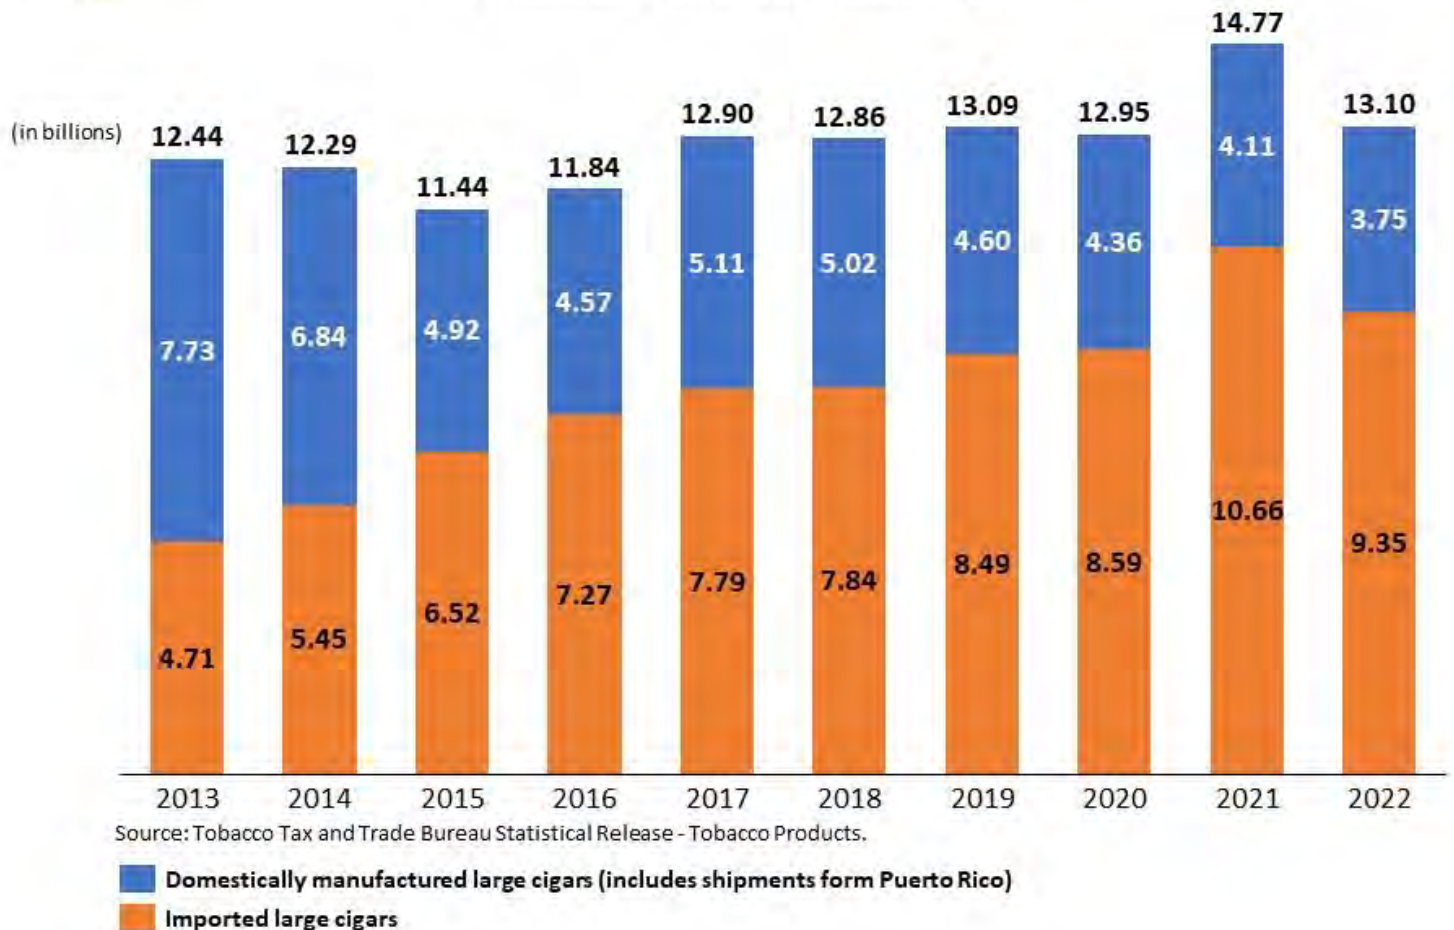

This graph includes yearly totals for taxable removal large cigars from domestic factory manufacturing (including Puerto Rico) and large cigar imports.

Taxable removal data from TTB is based on taxes paid on cigars at the time of importation or domestic factory production and are now ready for sale. The total large cigar taxable removals listed above on the graph from 2013 – 2022 is the combination of import data and the domestic manufacturing data.

Over the last 10 years, large cigar taxable removals have been virtually flat except for a 7% reduction from 2014 to 2015 and then the single year high in 2021 of 14.8 billion cigars. This was a jump of 14% from 2020 to 2021. But, from 2021 – 2022, that single year increase was offset by a decrease of 11% by the end of 2022. CY 2022 has ended right at the 10-year average of 12.8 billion large cigar taxable removals.

Large Cigar Taxable Removals From Domestic Factories and Imports

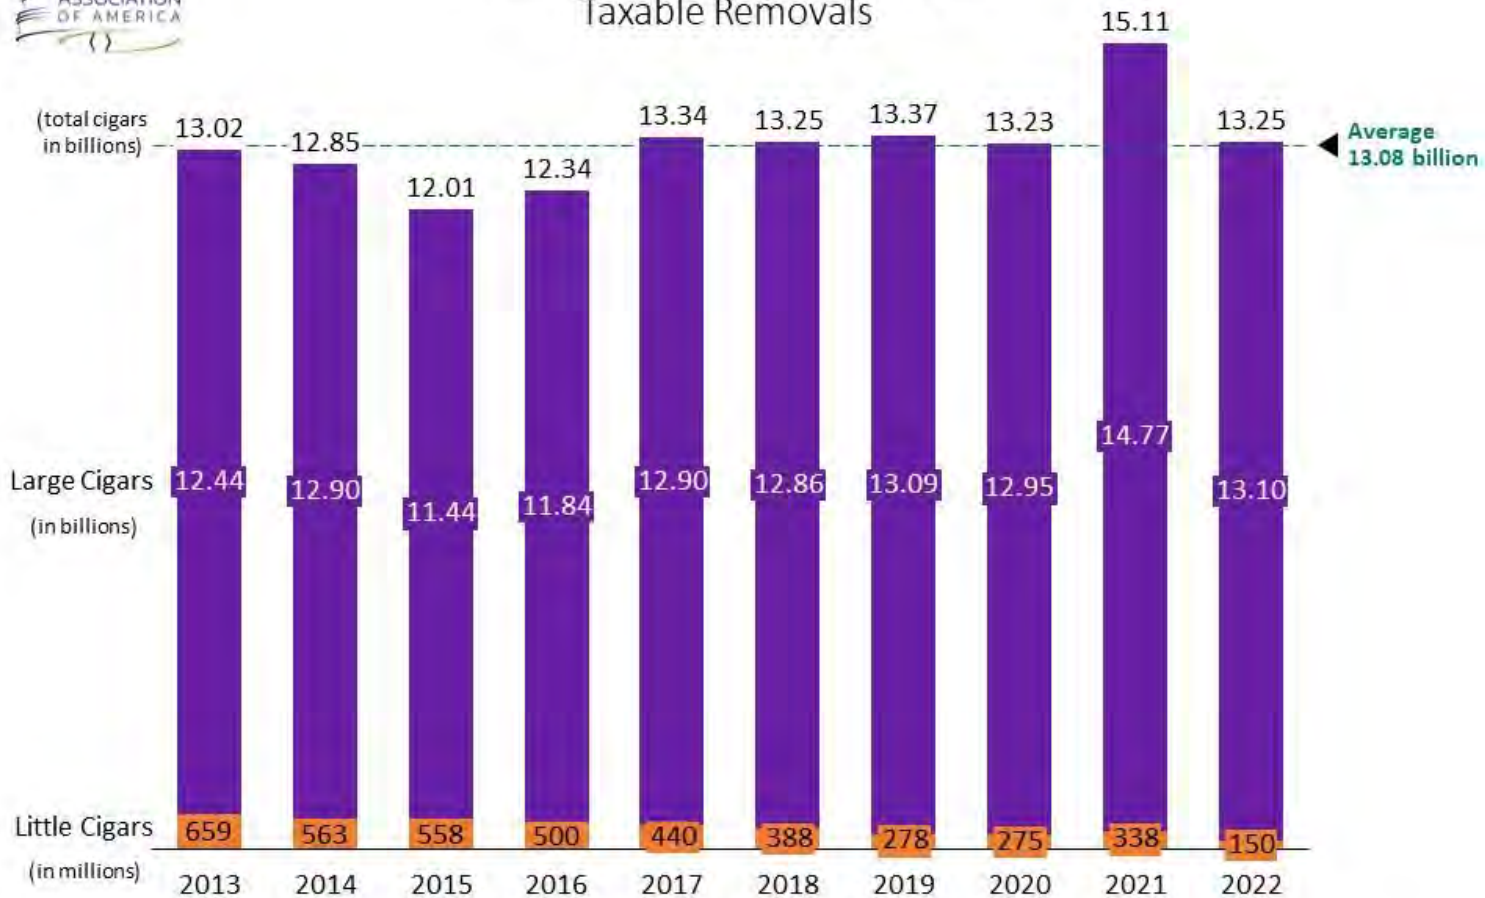

The above graph is a breakdown of the large cigars manufactured domestically and large cigars imported into the US from around the world.

Notice that the trend over the last 10 years has been a decrease in domestic large cigar production and an increase in large cigar imports. In 2013, 7.7 billion large cigars were made domestically in the US. In 2022, just 3.75 billion large cigars were produced domestically which is a drop of 51% from 2013 compared to 2022.

With the cost of domestic manufacturing increasing over the last 10 years, manufacturing in foreign countries and importing them into the US has become a more viable cost savings alternative.

Total Large and Little Cigars Taxable Removals

Source: Tobacco Tax and Trade Bureau Statistical Release - Tobacco Products.

This graph includes yearly totals for taxable removal large and little cigars from domestic factory manufacturing (including Puerto Rico) and little and large cigar imports.

The total taxable removal cigars include domestically manufactured cigars and imports and are made up of two types or categories of cigars: little and large cigars. In the bar graph above, about 98% of total taxable removals in CY 2022 were large cigars.

The high point over the last 10 years was in CY 2021 with 15.1 billion total cigars. CY 2022 ended with 13.25 billion total cigars which was just slightly over the 10-year average.

The highest year for little cigars was 2013 with 659 million little cigar taxable removals or about 5% of total cigars. For CY 2022, little cigars made up about 2% of total cigars.

The following pages of this December 2022 CAA Statistical Bulletin provide more detail on year-end taxable removals and other tobacco industry data.
